

Rubber Vine

Cryptostegia grandiflora

Cryptostegia madagascariensis

METHODS

Cut & Paint

Cut out big vines and paint stumps with herbicide. Remove as much of the plant as possible

Cut & Spray

For smaller vines cut to ground level with a brushcutter or pruners & spray the stumps.

Burn Piles

Dry and burn piled plants to remove fire hazard.

Burn areas

Where seed has spread burn areas or rake leaf litter into a pile and burn.

New Plants

Carefully spray or pull small plants. Make sure to get the roots as well.

Habit: Tough vine with glossy leaves and pink flowers. It has large seed pods and feathery seeds

Spread: The vine grows into the tree tops and seeds float on the wind and spread down rivers and streams. Some people have spread the smaller species by planting in gardens.

Weed because: It smothers native plants & takes over areas.
